

Book Sleeve Sizes

THREE SIZES · THE NUMBERS ONLY · METHOD IS ON THE PADDED BOOK SLEEVE SHEET

The four rules EVERY NUMBER BELOW COMES FROM THESE

W + thickness	+ ½"	+ 1"	+ ½" more
INSIDE WIDTH	EASE	LINING CUT · ½" SEAMS	OUTER & BATTING · QUILTING DRAW-IN

THE ONE THAT CATCHES PEOPLE OUT: thickness is part of the WIDTH. A flat sleeve has to wrap around the book, so the inside width is the book's width **plus its spine** — not its width. A 2" romantasy hardcover 6¼" across needs **8¾" of inside width**, not 6¼". Get this wrong and it will not go in at all. Height only ever needs ease.

PIECE	S · KINDLE	M · PAPERBACK	L · HARDCOVER
Outer + batting	7¾ × 9¼	8¾ × 10¾	10¼ × 11½
Lining	7¼ × 8¾	8¼ × 10¼	9¾ × 11
Finished inside	6¼ × 7¾	7¼ × 9¼	8¾ × 10
Ties (<i>optional</i>)	2 × 15	2 × 17	2 × 19
Band (<i>optional</i>)	7¾ × 3	8¾ × 3½	10¼ × 4

One fat quarter does the outer, one does the lining — for all three sizes. L is tight: lay the two pieces end to end across the 22" width, not the 18". Cut the outer and batting BIG and trim after quilting, which is what the extra ½" is for. Then test the fit before you sew the lining in. Padding eats more room than anyone expects, and that is the last moment it can be changed.

Which size

S Any Kindle Mass market paperback too. Same numbers as the Padded Book Sleeve sheet.	M Trade paperback Thin hardcovers up to 1¼". The everyday size — most books on most shelves.	L Hardcover · Scribe Takes a 2" spine. This is the romantasy size, and the only one a Scribe fits.

The Reading Nook Sleeve sits BETWEEN M and L. At 12" × 8½" outside it has about 7½" of inside width — a 6" hardcover up to roughly 1½" thick. A 2" romantasy hardcover will not go in it. Say so when someone asks, or make them an L.
